Neurosurgery 2015/2016 academic year

1. Lumbar disc hernia. Clinic, diagnosis, treatment. Indications for surgical treatment. Types of surgery.
2. Cervical disc hernia. Clinic, diagnosis, surgical treatment. Indications for surgical treatment.
3. Intracranial tumors – classification. intracranial hypertension syndrome.
4. Intracranial tumors with supratentorial hemisferial location – clinical manifestations, diagnosis, treatment.
5. Intracranial tumors. subtentorial location – clinic. diagnosis, treatment.
6. Intracranial tumors in the sellar area - clinic, diagnostic, treatment.
7. Spinal tumors. Classification, Clinical picture. Diagnostic tests. Surgical treatment.
8. Craniocerebral injuries - classification. Basic principles of treatment.
9. Fractures of the skull base and Calvary –fracture types, diagnosis, treatment.
10. Closed craniocerebral injuries - concussion, contusion clinic, diagnosis, treatment.
11. Brain compression : epidural hematoma, subdural hematoma, subdural hydroma, intracerebral hematoma - clinic , diagnosis , treatment.
12. Gunshot craniocerebral trauma : clinical characteristics, diagnosis , treatment.
13. Severe cranio-cerebral injury - clinic , prognosis and outcome.
14. Sequellae after cranio-cerebral injury : posttraumatic dizziness, encephalopathy. Treatment .
15. Spinal injuries - classification , pathogenesis, Pathomorphology , neurological syndromes , diagnosis and treatment. Spinal reconstructive surgery .
16. Brain aneurysms - clinical characteristics and treatment .
17. Arteriovenous malformations –classification, clinical characteristics and treatment .
18. Brain abscess - etiology , pathogenesis , clinical features and treatment.
19. Cystic cercosis of the brain and hydatid disease - clinical treatment
Hydrocephalus - Pathogenesis, clinical characteristics and treatment.
20. Congenital diseases of the nervous system - disrhafic syndrome.
21. Functional Neurosurgery .
