PRACTICAL EXERCISES – THESES

PEDIATRIC HISTORY (1ST PART)

PRACTICAL EXERCISES – THESES

Taking history is important ability to gather information through interview with child, parents, relatives or other attendant of the patient. Purpose of pediatric history is to find out:

1. The correct diagnosis
2. the psychological, family and social context of a child's illness.
3. The child's previous and accompanying health problems.
4. The appropriate examination and investigation approach.
5. The appropriate treatment strategies.

PARTS OF PEDIATRICS HISTORY TAKING PROTOCOL (EXAMPLE) (1-6 point)

1. Patient's profile (name, age, sex)
2. Presenting complaints
3. History of present illness (onset, duration, treatment, complaints of systems)
4. Birth history (pregnancy, delivery, postnatal/neonatal history)
5. Feeding history (type of feeding, weaning, current diet)
6. Immunization
