FOR E- LEARNING IN PEDIATRICS

ENGLISH MEDIUM COURSE OF TRAINING

SPECIALTY OF MEDICINE

ACADEMIC DEGREE: MASTER

PROFESSIONAL QUALIFICATION: DOCTOR OF MEDICINE

PREPARED BY DR. STANIMIRA ELKINA, PHD

PRACTICAL EXERCISES – THESES

PEDIATRIC PHYSICAL EXAMINATION (1ST PART)

PRACTICAL EXERCISES – THESES

Differences of the physical examination of a child compared to that of an adult patient: variances according to the age of the patient.

GENERAL APPROACH IN PERFORMING PEDIATRIC PHYSICAL EXAMINATION

1. Observation of the child's behavior before examination's start - get general impression of overall attitude.
2. Position of child – does the child walk/sit alone, sits in parent's lap or goes through the examination room etc.
3. Try to build a connection with the child and to win child's trust.
4. Order of exam - from least to most distressing
5. Examine painful area last – distract the child if possible.
6. Appropriate attitude of the physician according to the different childhood's periods

PRACTICAL EXERCISES – VENUE AND MATERIALS

- Department of Pediatrics, UMHAT - Pleven
- Pediatric lectures
- Clinical task and MCQs
